Thanks for the update, Art. A Monday chat sounds great – are you available anytime between 12-2pm or 2-3:30pm?
Best,
Jennifer

Jennifer,
Great to talk to you.
Yes, we were on track for March for TM#2, However Simplot requested an extension for 30 days to be able to meet the requirement.
I have approved an extension of 30 days, to April 6th, in an email, and I am drafting a letter to that effect to be sent out to all Agencies hopefully very soon.
I would like very much to chat with you, perhaps Monday?
I am buried in Agency required training for the rest of the day, to maintain my certifications, and won't be available to chat until Monday, if that is a good day for you.
Best Wishes.
ab

Hi Art,
Also wanted to inquire on if there is a 2020 project schedule out for Smoky Canyon from Simplot, or one that carries over from 2019 (like Conda, attached). I have been tied up with my other sites and getting up to speed there but would like to chat with you again in the near future on where Smoky is at / going and what's coming up this year. If I am tracking correctly, we are expecting the first draft of TM #2 in March?
Thanks,
Jennifer

Jennifer,
I am checking on this.

Thanks Rick.

Art, are final electronic data deliverables (Excel) something that USFS could request from Simplot as a required component for future deliverables? This would be consistent with agency deliverables for Conda also.

Best,
Jennifer

Hi Jennifer -I only receive the pdf reports with these emails from Jeff Hamilton. I have not received any zip or excel files.

Art – do you typically receive any zip or excel files with these reports?

Thanks

Hi Art and Rick,

Are there any electronic data files that accompany the Smoky reports? On Conda deliverable emails, zip data files were getting stripped unknowingly when Lily sent them due to our EPA server so just wanted to double check on Smoky. I know this current Hoopes report data was limited to weeks 90 and 92 but assume an Excel version would include historical info also.

Give me a call if that's easier. Thanks!

Jennifer

Art,

Attached is the November 2019 Progress Report for the Ultra-Filtration/Reverse Osmosis and Biological Selenium Removal Fluidized Bed Bioreactor Treatment Technology Pilot Study for the Smoky Canyon RI/FS. Hard copies will follow as indicated in the attached letter.

Let us know if you have any questions.
